Instructions

Tools Required: Screw & Screwdriver (Not provided with kit)

1. Refer to your OEM instructions on how to safely remove the old floor register.
2. Remove your old floor register (A) and discard. Do not discard the old screws (B).
3. Measure your floor duct opening size (C).
4. Select the appropriate floor register for your need. Danco offers 4 different sizes.
Always choose a size slightly bigger than the duct opening itself. For example, if your duct size is 3 1/2" X 9 1/4" then choose the 4" width X 9 3/4" length (62068).
5. Install new register into your floor opening using the screws as shown on Image I.
Note: Some ducts don't require the screws to hold register in place. If your duct opening doesn't have screw holes, then simply set the register into the floor opening.
6. Adjust the damper handle as desired.

Danco	Actual floor opening size	Overall front size	Depth
62067	4" width x 7-3/4" length	5-3/8" width x 9-3/8" length	0.85"
62068	4" width x 9-3/4" length	5-3/8" width x 11-3/8" length	0.85"
62069	4" width x 7-3/4" length	5-3/8" width x 10-1/8" length	1.37"
62070	3-3/4" width x 9-7/8" length	5-3/8" width x 12-1/8" length	1.37"
